Course Description:

Based on South Carolina Career and Technology Standards and ASE Guidelines, **Auto Collision Repair III** prepares students to repair automobiles and light commercial vehicles under the supervision of an ASE Master Collision Repair Technician/Estimator. Automotive Collision Repair Technology students receive instruction in frame alignment, surface finishing, and shop management. Upon successful completion of the program, the student will be prepared for postsecondary education and entry-level automotive collision repair-related careers. During the first semester students will spend approximately 80% of instructional time in “Hands-On” practice. Students will perform repairs on panels, simulators, & automobiles based on previous classroom theory with instructor present.

Course Objectives:

Given the necessary equipment, materials, and instruction, students upon completion of the prescribed course of study, will successfully accomplish the S.C. Department of Education’s CATE core competencies. Students must complete a minimum four-unit sequence of CATE courses in order to be completers of the Automotive Collision Repair Technology program.
